

PAM-series, air hydraulic pumps

- Twin air motor configuration delivers high-flow performance for rapid cylinder advance
- 4 and 8 litres reservoirs for use with a wide range of cylinders
- Integral shroud protects air motors and provides easy carry

For Use with Cylinder		Pump Speed		Usable Oil Capacity litres	Model Number With shroud	Output Flow Rate l/min		Valve Type and Function			Air Pressure Range * bar	Air Consumption l/min	Sound-level dBA	Weight kg
