

Introducing the CP9883 & CP9884 Air Riveters

The newest addition to the riveter offering, replacing the current RP9840 and RP9850 riveters. The CP9883 is a 3/16" riveter and the CP9884 is a 1/4" riveter.

Some of the great features and benefits include:

- **Powerful pulling load of 3520 lbs(1600 kg)** gives a soft effect and clean breaking of the shaft, even on full stainless steel rivets
- **Low Noise level < 66 dB(A)** minimizes sound level for operators acceptance
- **Low vibration technology < 2.5m/s²** allows for long use without fatigue
- **Very easy maintenance and set up** that allows for minimal down time
- **Light weight reduced to 3.2 lbs (1.46kg) + hook** reduces the operators fatigue for intensive applications (4.19 lbs – 1.9kg for the CP9884)
- **6 nose types available on the range:** 3/32" (2.4mm), 1/8" (3.2mm), 5/32" (4mm), 3/16" (4.8mm) & 1/4" (6.4mm) + 1/4" (6,4mm) Monobolt cover a majority of light industry applications
- **Air Exhaust adjustment with vacuum system** allows for riveting even on vertical applications
