

## Crimped Wire Wheel Brushes - Tube Center Brushes and Accessories - Tube Center Drive Arbors

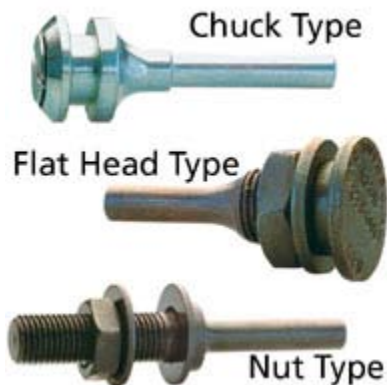

ADVANCE BRUSH offers a complete range power brushes for Industrial use, including Wheel, End, Cup, Shaft Mount, and Tube brushes. Featuring M-BRAD™ Nylon Abrasive filament wheels, cup, disc brushes and more.

Advance manufactures a complete range of individual filament, crimped wire wheels for individual or gang-mounted use. Features include heavy fill density for more wire points, which means more brushing action and longer life; oil tempered, industrial quality wire, and uniform wire disbursement for optimal balance and finish. Choose from Narrow, Medium and Wide Face models, with an additional selection of wheels manufactured exclusively for bench and pedestal grinders.

These small diameter Advance wire wheel brushes are designed for use in restricted or hard-to-reach areas. They are excellent tools for burring, blending, and cleaning of surfaces.

**Drive Arbors for Advance Tube Center wheels** are available in three styles:

- **Chuck:** Countersunk head tightening-screw fits into a recessed flange washer for locking power. Allows brushes to reach edges without interference from arbor overhang. Change brush without removing arbor from collet. Unthreaded shaft.
- **Flat Head:** Brush mounts between a single washer and the flat head. Locked in place with a left hand reverse threaded nut. Allows the brush to be close to the work piece. Threaded shaft.
- **Nut:** Nut can be removed to replace worn brush while arbor is in chuck.
