

## End Brushes - Specialty End Brushes - Coil Spring Brush

ADVANCE BRUSH offers a complete range power brushes for Industrial use, including Wheel, End, Cup, Shaft Mount, and Tube brushes. Featuring M-BRAD™ Nylon Abrasive filament wheels, cup, disc brushes and more.

Advance Brush is focused upon manufacturing your preferred end brush. As a result, Advance offers the widest end brush product selection anywhere. Choose from various different cup styles, knot arrangements, filament types and specialties such as bridles, encapsulation and coated cups.

Advance Coil Spring brushes are unique tools offering flexible heavy cleaning action. Flexible carbon steel wire is supported by a coiled spring, which may be trimmed as brush wears. Ideal for cleaning deep cavities, tubing, and more.

Operating Tip: Do not run the coil spring brush free of contact with the work. Insert it into the work to be brushed before turning on power. If run free, the brush may whip, break, and fly off tooling, endangering personnel in the area.
