

CT604 Safety Tool, Coupler Bleed Tool

[view presentation](#)

- Eliminate unsafe pressure relieving and bleeding activities such as:
- using a hammer and punch to unseat check balls, cones & poppets
- using a wrench to 'loosen' a coupler.
- Designed to connect to Enerpac C604, CH604 and CR400 High Flow couplers (male & female halves).
- Coupler Bleed Tool will also work with competitive equivalents.
- Comes in a convenient storage box that keeps the parts together.
- Enerpac engineered safe for use at 10,000 psi (700 bar).

Coupler Bleed Tool Model Number	Fits on High Flow Couplers		Maximum Operating Pressure	
	Female Half	Male Half	psi	bar
	CT604	CR400	CH604	10000
