

HICOAT Coated Tungsten Carbide Burs - HC-FE Coating for Steel, Cast Iron - Cylindrical (Plain End) - Shape A

PFERD conveniently lists all Tungsten Carbide Burs and and Bimetal Hole Saws and Accessories into a single and concise catalog, Section 202.

Precision CNC manufactured PFERD carbide burs offer unparalleled rotational balance, service life and performance. PFERD has decades of manufacturing experience, producing the highest performance bur on the market.

Benefits of Coatings on PFERD Tungsten Carbide Burs:

While PFERD burs are internationally recognized as the highest quality attainable on the market, specialty coating further optimize several operating characteristics. They extend the service life of the tool by reducing wear. Coatings provide superior chip removal due to improved anti-friction properties. Coated burrs generate less heat while in use. And, they can be run at higher RPM's, which improves your productivity.

While burs listed on this website are stock solutions, PFERD can coat any bur with these and more specialty coatings. Please contact your distributor for additional information.

HC-FE Coating

HC-FE Coating is specially designed for use on iron and steel. The performance advantages on these materials include high wear resistance, and high temperature cycling strength.
