

## P and 11-series, ultra high pressure hand pumps

- Two-speed operation on the P-2282 allows for faster fill operation, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, alcohol, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 2800 bar rating
- For 2800 bar fittings and valve download catalogue page

Pump Speed		Useable Oil Capacity	Model Number	Pressure Rating *		Oil Displacement per Stroke		Maximum Handle Effort	Piston Stroke	Weight
Single	Two			bar		cm3				
		cm3		1st stage	2nd stage	1st stage	2nd stage	kg	mm	kg
-	•	983	<b>P-2282</b>	13	2800	16,22	0,61	488,1	25,4	6,4
