

Knot Wheels, Unthreaded - Short Trim Heavy Duty

ADVANCE BRUSH offers a complete range power brushes for Industrial use, including Wheel, End, Cup, Shaft Mount, and Tube brushes. Featuring M-BRAD™ Nylon Abrasive filament wheels, cup, disc brushes and more.

Advance unthreaded knot wheels are available in a variety of twist-types and knot configurations. Ranging from 3" to 16" in diameter, selection includes standard twist single and double row brushes for aggressive brushing action, as well as specialty brushes like short trim wheel for high impact, heavy duty use, and long trim for a less aggressive brushing action and improved surface finish. Includes pipe cleaning and joint expansion brushes.

Short trim, heavy duty knot wheel brushes are designed exclusively for applications requiring maximum brushing action, without regards to surface finish. The large hubs generate excellent peripheral speed. The short trim lengths provide a vary stiff brushing action. And the vast quantity of knots per brush create an extended service life.
