

# SLS-Series, synchronous lift systems

## Controlled Hydraulic Movement

- Up to 64 lifting points, load and stroke monitored and controlled
- Capacities from 10 up to 1000 ton per lifting point
- Up to 0,1 mm accuracy over full plunger stroke
- PLC-control unit with user friendly touch screen
- Automatic data storage and read-out for reporting and graphical representation
- System security with warning and stop features for optimum safety
- Many optional System Management & Control Features (see catalog page)

1. Hydraulic pump, 2. PLC-control with touch screen, 3. Hydraulic cylinders, 4. Stroke sensors  
5. Hydraulic hoses, 6. Sensor cables, 7. Solenoid control valves, 8. Pressure transducer.
