

LCA-series, clamp arms for link clamps

- In standard and extended lengths
- Standard arm includes set screw and lock nut
- Long arm can be machined on-site to match your needs

Pressure vs. clamping force

The use of different length clamp arms requires reduction in applied hydraulic pressure and resulting clamp force.

Download the catalogue page showing the diagrams showing the pressure versus clamping force relation ship.

Clamp Arm Model Number		Clamping Force	Fits on Link Clamps
Standard	Long	kN	
LCAS-32	LCAL-32	1,3 - 3,0	LUCS-32, LUCD-32
LCAS-82	LCAL-82	3,6 - 8,0	LUCS-82, LUCD-82
LCAS-122	LCAL-122	6,2 - 12,0	LUCS-122, LUCD-122
