

Machinist Files - CORINOX® Files for Stainless - CORINOX® Round

CORINOX® - machinists files are designed for use on stainless steels and exotic alloys. With a surface hardness of 1200 HV, these files offer excellent wear resistance and long service life. Their stainless steel surface leaves no corrosive residue on the work piece and effectively resists loading.

Round CORINOX® file designed for enlarging circular holes or rounded grooves that are too small for a half round file. It tapers toward the point making it adaptable for use on various size holes.
