

## Marking Pens - MST 31 Marking Pen

PFERD offers a wealth of possibilities for combining abrasives and power tool systems to achieve the perfect solution for any given material/workpiece and machining task. PFERD power tools include electric, pneumatic and flexible shaft machines. Accessories and tool maintenance equipment for all tools is also available.

Marking pens are pneumatic tools with tungsten carbide engraving needles. They are used for engraving markings in metal, glass, plastics and even heat-treated steels.

Model MST 31 Marking Pen is available with your choice of engraving needle included. Additional or replacement needles may be ordered separately. PFERD MST 31 is different from competitive marking pens in the market. It runs at a frequency of 500-600 strokes per second or between 30,000 and 36,000 strokes per minute. Compared to competitive tools, the PFERD tool is much faster - Nearly 3 times faster than the majority of tools on the market. This high frequency allows the user to engrave with much greater precision for far superior results.

- Ring (twist) throttle
- Front exhaust
- Air hose length 79", 4mm I.D. with 1/4" coupling included
- 500-600 strokes/sec.
- Carbide engraving needle included
