

Mill Files - Depth Gauge Files

Mill files are suitable both as an engineering and a sharpening file. Mill files are the best choice for filing where a smooth finish is important. Also good for polishing and deburring work in lathes. Mill files are widely used for sharpening tools and implements. Two square edges. Single cut on sides and edges. All sizes slightly tapered in width.

This file has two safe edges and is used for filing depth gauges on saw chain.

EDP	Name	Shape/Form	Length	Width	Thickness	Cut	
17043	Depth Gauge File	Flat	6	5/8	3/32	Second (Cut 2)	Request Info
17044	Depth Gauge File	Flat	8	25/32	1/8	Second (Cut 2)	Request Info
