

Polishing Tools & Pastes - Diamond Polishing Pastes – Pastes

PFERD produces a complete range of coated and non-woven abrasives including Fiber Discs, Flap Wheels, Belts, Flap Discs, Rolls and much more. With innovative specialties like POLICAP® seamless abrasive caps, you'll find new solutions for your finishing needs with PFERD.

PFERD offers an extensive range of polishing tools in diverse shapes and diameters. A wide selection of products is available to achieve refined surfaces on all materials. Felt wheels and points, cloth rings, polishing pastes and grinding compounds create a product selection that will allow you to achieve your desired surface finish on any workpiece geometry.

Diamond Polishing Pastes are designed for working on very hard materials, e.g. tungsten carbide and heat-treated steels. They are used with felt points or felt wheels. The high concentration of abrasive grain guarantees fast and efficient results. The selection of the appropriate grit size will essentially depend on the required surface finish.

When working with diamond polishing paste, it is recommended to start with the coarsest grit. Where major surface improvements have to be achieved, use several grits of increasing fineness in successive steps and clean the workpiece thoroughly after each passed step. Always use a new, clean tool (e.g., felt point, felt wheel) before switching to finer grit. Available Grit Sizes

- 30 = Coarse
- 15 = Medium
- 7 = Fine
- 3 = Very Fine
