

## PID-series, oil to oil intensifiers

- High flow units intensify low inlet oil pressure to high outlet pressure
- Internal bypass valving enables high output flow rates
- Includes dump valve, eliminates the need for an external pilot check valve
- Wide range of intensification ratios allows for adapting to various operating pressure requirements
- Compact and self-contained design allows for ease of installation
- Select fit of all internal components provides long operating life

Maximum output pressure bar	Pressure Intensification Ratio	Maximum Input Flow	Maximum Output Flow	Model Number	Inlet Pressure Range min - max. bar	Weight kg
		l/min	l/min			
640	1 :3.2	15,0	2,5	<a href="#">PID-322</a>	20 - 200	1,2
700	1 :4,0	14,0	2,0	<a href="#">PID-402</a>	20 - 175	1,2
700	1 :5,0	14,0	1,6	<a href="#">PID-502</a>	20 - 140	1,2
700	1 :6,6	13,0	1,3	<a href="#">PID-662</a>	20 - 106	1,2
