

FL-series, high pressure filters

- Inline high pressure filters to keep your hydraulic system clean
- Plated stainless steel wire mesh screen
- Rated for full system pressure up to 350 bar
- Filtration of hydraulic oil in advance and retract oil flow direction
- Two piece body construction for easy replacement of filter elements
- High flow rates are obtainable with a minimum pressure drop
- Threaded port connections on each end simplify installation

Filtration nominal (micron)	Filtration absolute (micron)	Model Number	Max. Pressure (bar)	Oil Connection	Filter element set
10	25	FL-2102	350	G1/4"	FL-2101K
20	40	FL-2202	350	G1/4"	FL-2101K
