

Thin Cut-Offs for Angle Grinders - Cut-Off Wheel Test Paks

PFERD Grinding & Cut-off Wheels offer world-leading performance. For free-hand, portable, chop and stationary saws.

PFERD thin wheels cut faster than conventional wheels, leaving a cleaner cut, with minimal burr. Thin cut-off wheels are ideally suited for thin gauge sheet stock, thin walled tubing and small diameter cross sections. Material should always be cut at a right angle to the work piece. Larger work pieces require thicker PFERD cut-off wheels for improved lateral stability.

Not sure which performance level is right for your application? Pick up a test pak and put them to the test on your grinder!

EDP	Diameter	Thickness (Inches)	Arbor Hole	Shape/Form	Grit	Max. RPM	Contents
