

## MVP, V-series, sequence valves

- Pressure dependent sequence control
- Direct accurate pressure setting

### MVPM-5

- Pressure setting between 35 - 350 bar for secondary circuit is secured with lock nut
- Manifold mounting ports

### V-2000

- Pressure setting between 14 - 140 bar for secondary circuit
- Flag indicator appears every time the valve is operated

Pressure Adjustment Range	Maximum Pressure	Maximum Oil Flow	Model Number	Oil Ports	Operating Pressure Check Valve	Weight
bar	bar	l/min			bar	kg
14-140	350	4,1	<b>V-2000</b>	1/8"-27 NPT	-	0,9
35-350	350	6,0	<b>MVPM-5</b>	G 1/4"	1,4	1,3

Seal material: Buna-N.

For manifold mounting installation information consult Enerpac for surface preparation.
