

PSCK, VFC-series, pressure switches and flow control valve

- To control your hydraulic system
- Mounts directly into VP-series modular valves
- In-line installation, manifold mounted for remote use

Pressure switches PSCK-8, -9

- Adjustable, will open or close electrical contacts when desired preset pressure is reached
- Lockable adjustment screw

Flow control valve VFC-3

- Screw-in throttle valve
- Controls the amount of oil flow to hydraulic cylinder, controlling cylinder speed

Pressure Range	Deadband	Maximum Oil Flow	Pressure Switch Model Nr.	Flow Control Valve Model Nr.	Voltage	Current
bar	bar	l/min			VDC	Amps
100 - 350	18 - 35	7,0	PSCK-8	-	24	2
20 - 210	6 - 15	7,0	PSCK-9	-	24	2
0 - 350	-	7,0	-	VFC-3	-	-
